

OBJECTIVES OF THE NETWORK OF EXCELLENCE

To federate the researches in the domain of user/system interactions and their applications on in-vehicle information systems and advanced driver assistance systems.

To create a European Virtual Centre of Excellence on HUMAN centred design for Information Society Technologies applied to Road Transport.

Developing a coherent joint program of activities, including

A set of Research Activities
to investigate all the various aspects of human-centred Design

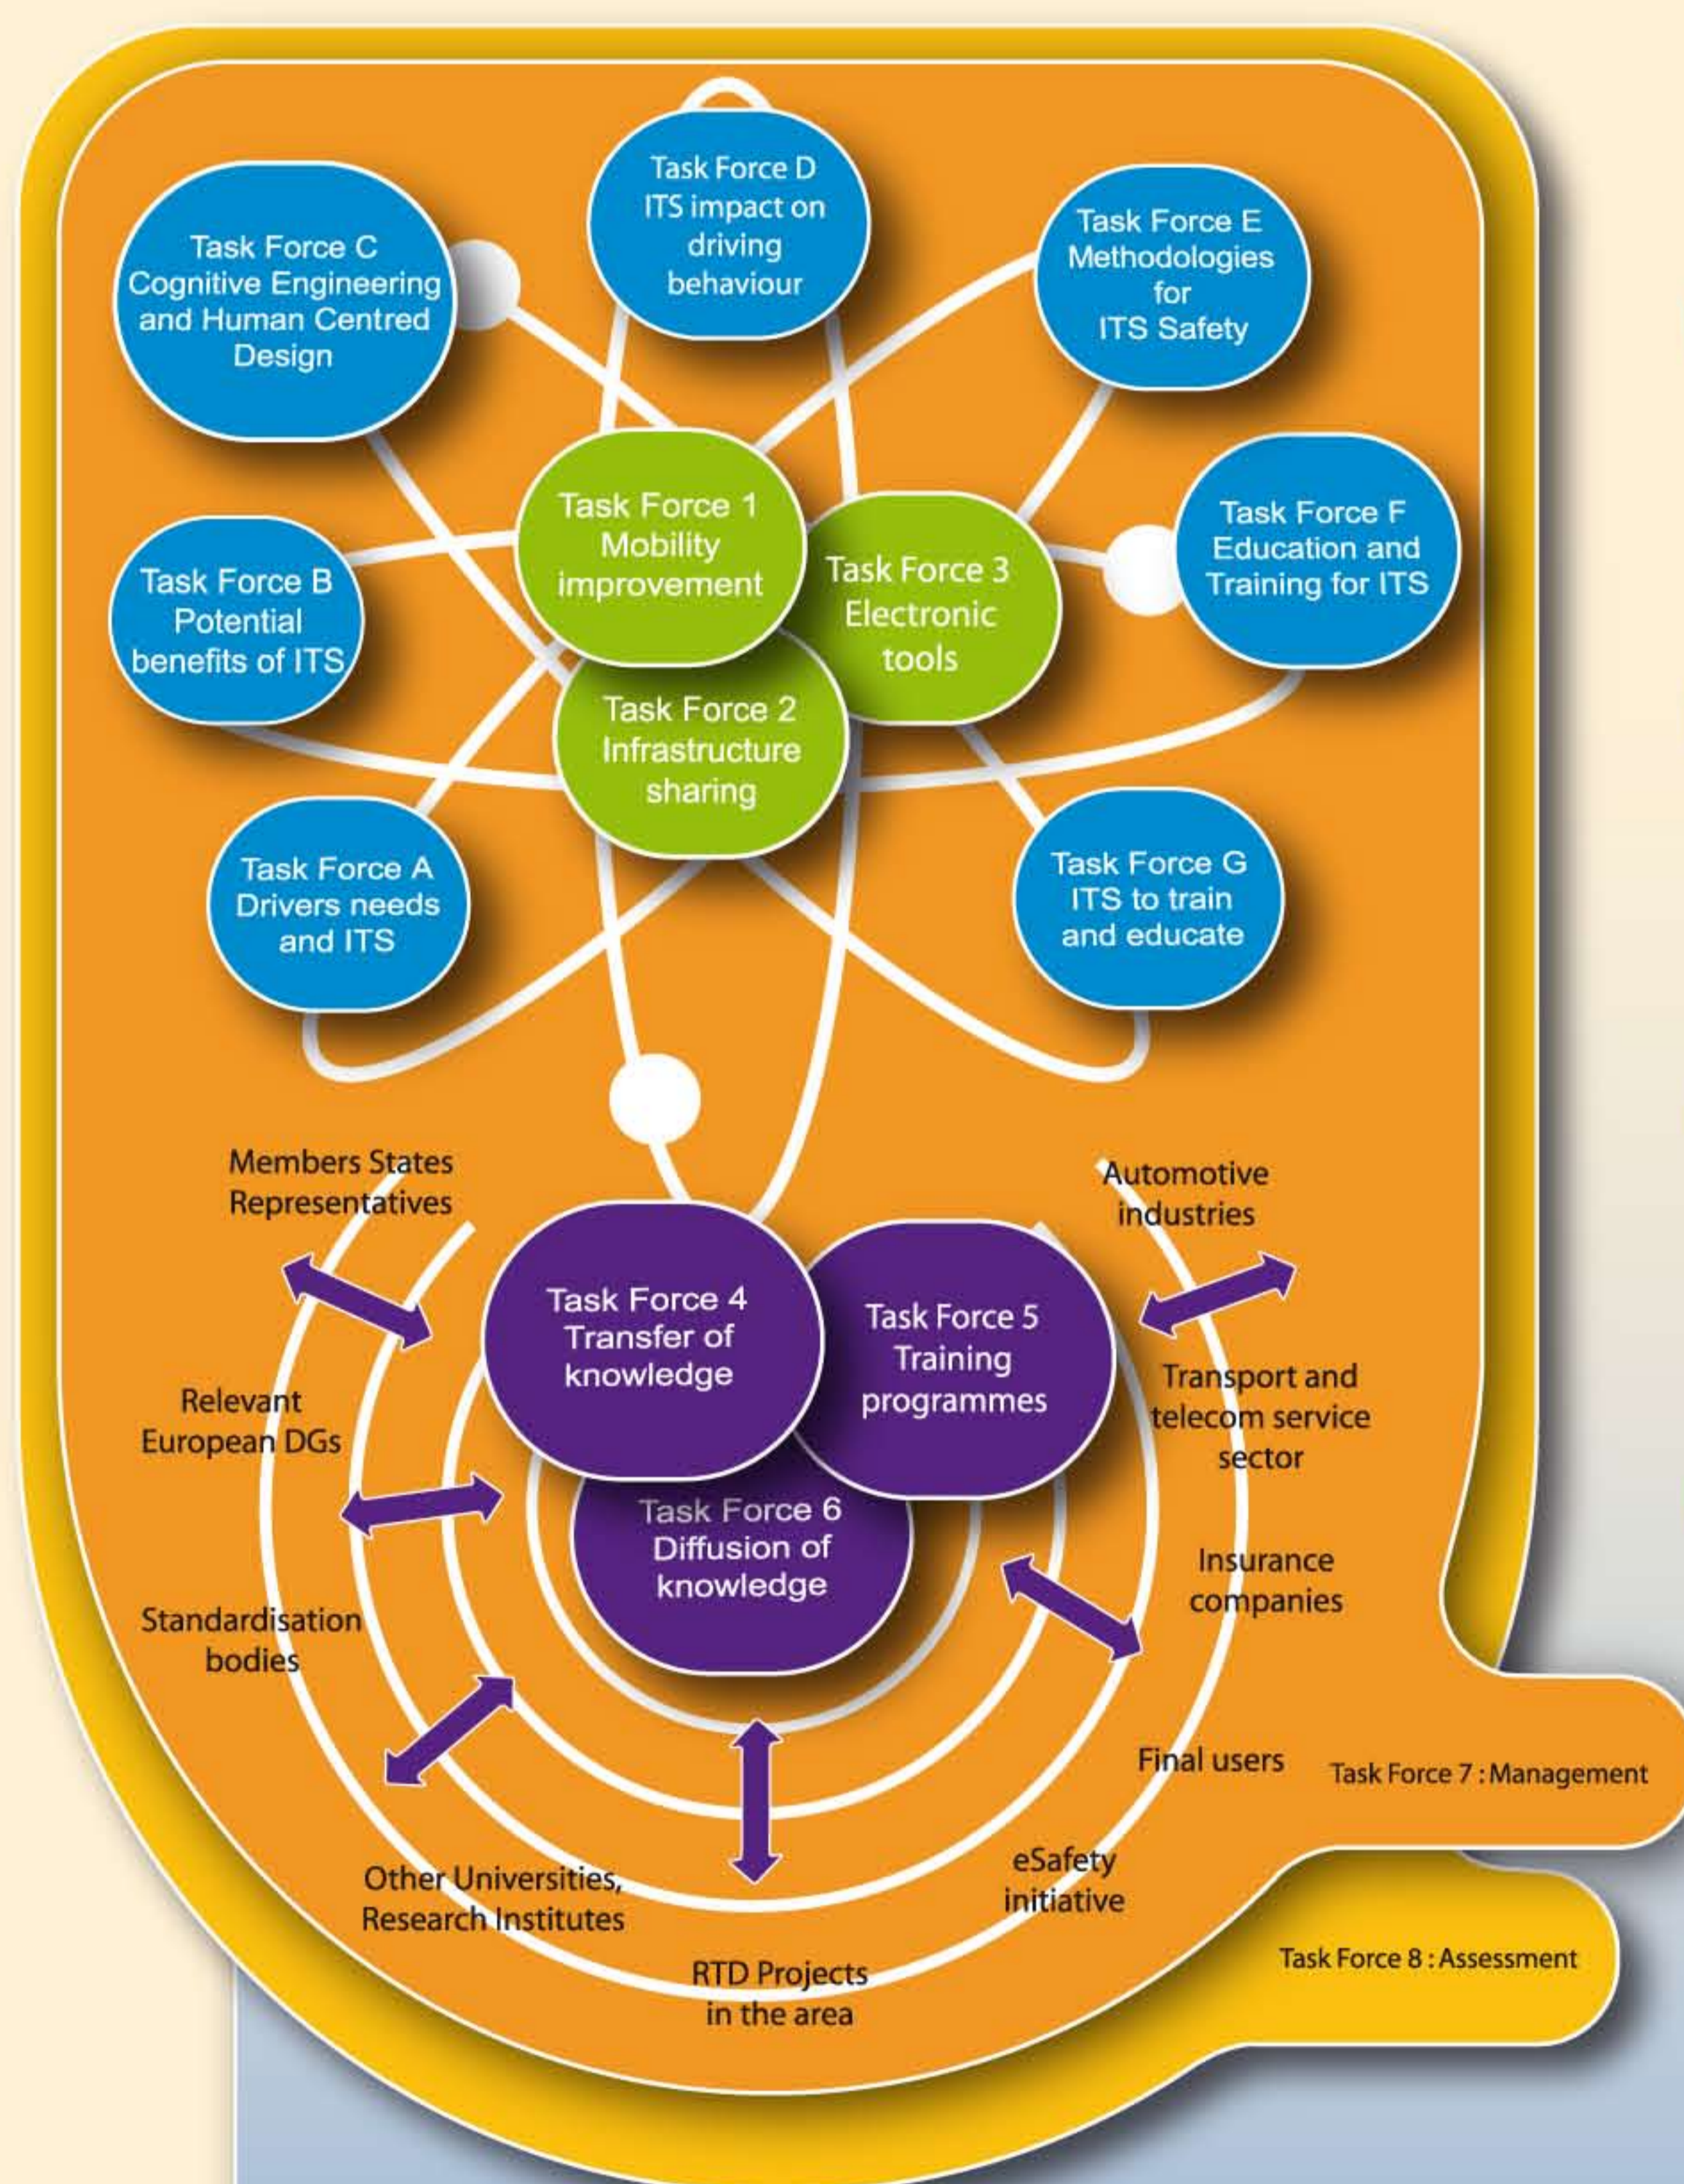

A set of Integration Activities
to manage and consolidate the NoE research structure

A set of Spreading of Excellence Activities
to distribute the knowledge widely from the NoE

A set of Management Activities
to assess the quality and the sustainability of the NoE integration

Promoting human-centred design for IVIS and ADAS :

- to devise systems according to users' real needs and requirements
- to ensure their relevance and their acceptability
- to detect potential adverse consequences of their implementation and distribution

Contribution to the eSafety initiative Enhancement of mobility and improvement of road safety
