

## **PARTNERS OF THE NETWORK OF EXCELLENCE**

The human factors competencies exist in Europe, but are scattered through out various countries and various research institutes or universities involved in road safety and transport. The goal of HUMANIST is to integrate them and promote human-centred design to support mobility and improve road safety.

24 partners from 15 european countries.  
125 searchers et 40 PhDs.

**This integration, during the deployment of intelligent transport system, will allow:**

- to increase societal benefits
- to harmonise approaches among Members State
- to react quickly to any new technological developments
- to face the international challenge

**Strengthening and perpetuating collaborative work**  
**Gathering and debating scientific knowledge**  
**Promoting joint research activities**  
**Setting up the next generation of researchers**
